Forecast for Friday 08 Nov 2024

Weather: Cloudy and overcast overnight and early morning with mist, fog and occasional drizzle. The cloud tending to lift a little during daylight hours then lowering again in the evening. There is a marked temperature inversion due to the dominant high pressure system. This means that some of the highest summits like Pen y Fan could be cloud free at times, but details around this are uncertain.

Chance of cloud-free hill tops above 600m: 10%.

Low cloud and visibility: Extensive low cloud, base 100 to 400m, the lowest bases early and late in the day. Visibility moderate to very poor, becoming good at times lower down during daylight hours. Very good above any cloud.
